

AKVIS MakeUp 6.0: Make Your Portrait Shots Look Just Perfect! Major Update

February 13, 2019 – AKVIS announces the major update of MakeUp 6.0, a powerful software to embellish, enhance, retouch, and fix portrait photos. Version 6.0 offers the enhanced retouching algorithm, the Notification Panel, new built-in presets, the Chinese interface language, increased stability as well as some other improvements and bug fixes.

AKVIS MakeUp is a portrait-beautifying software that automatically evens out the skin tone and removes the blemishes making any portrait that much better. The software works in two modes: *Express* (for performing corrections with one single mouse click) and *Advanced* (for more sophisticated image manipulation). Other remarkable benefit is the *Batch Processing* feature that allows processing any number of individual photos in a single session.

Version 6.0 offers the enhanced retouching algorithm that works even better with large blemishes and is more powerful when processing high-resolution images. It removes undesired defects and imperfection making the skin look fresh and rejuvenated.

The updated program includes two new parameters: *Large Defects* that allows users to automatically get rid of large blemishes; and *Skin Texture* that imitates the skin's surface structure and makes it look more natural, flawless, and even-toned than ever before!

Also, the recent version provides the integrated *Notification Panel*, new ready-to-use presets, the *Chinese* interface language, increased stability as well as some interface improvements and bug fixes.
