

## **AKVIS NEON 3.0: BRING CHRISTMAS TO YOUR PHOTOS!**

*December 19, 2017 — AKVIS announces Neon 3.0, an easy-to-use and flexible software for transforming ordinary photos into neon images. Version 3.0 offers the new Color Variety parameter that adds more colors and magic to your photos. The glowing lines effect becomes even more spectacular! In addition, the updated version offers a number of new presets, full compatibility with Photoshop CC 2018, and other improvements.*

**AKVIS Neon** allows you to enhance your photos by applying impressive glowing effects and giving them a luminescent look. The program adds a holiday touch to any photo! Use it for creating memorable greeting cards for your friends and family, attention-grabbing backgrounds, abstract paintings, stylish book illustrations, etc. Or just edit photographs of Christmases gone by and preserve them for future generations. You are only limited by your imagination!

**Version 3.0** offers the new *Color Variety* parameter that adds more colors to the resulting image making it more vibrant and festive.

Also, the updated version offers a number of new ready-to-use presets, full compatibility with Photoshop CC 2018, new Gray interface theme, support for new RAW files, and some other improvements and bug fixes.
