

Massive Update: Compatibility with macOS Mojave and Photoshop CC 2019!

November 27, 2018 – AKVIS is pleased to reveal that all AKVIS programs are now compatible with macOS Mojave (10.14) and Adobe Photoshop CC 2019 (version 20.0). In addition, the recent versions bring support for new RAW files and minor bug fixes.

AKVIS offers an impressive palette of standalone applications and plugins ranging from decorative artistic effects to professional photo enhancement programs. Depending on their purposes, AKVIS image editing programs are divided into five categories: [Artistic Effects](#), [Special Effects & Decoration](#), [Photo Retouching](#), [Image Enhancement](#), and [Professional Tools](#).

The current versions of the AKVIS programs are compatible with Apple's latest operating system - macOS 10.14 (Mojave). Thereby, all AKVIS image editing programs now run on Windows 7, 8, 8.1, 10 - 32-bit, 64-bit; Mac OS X 10.11 and macOS 10.12-10.14 - 64-bit.

Also, the updated versions offer full compatibility with Photoshop CC 2019 (version 20.0), support for new RAW files, and minor bug fixes.

The recent versions are available for download at akvis.com.

Customers who bought or upgraded their licenses during the last 12 months can update to the new versions for free. Users whose licenses are older and are not valid for the latest versions can update each program for \$14.95 or update all of the products at once for only \$39.95.

AKVIS programs can be purchased as separate products or all together in the [AKVIS Alchemy Bundle](#) with 60% discount.

AKVIS (akvis.com) specializes in the development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
