AKVIS COLORIAGE 10 BECAME EVEN MORE EASY! NOW WITH VARIATIONS OF COLORING

September 4, 2015 — AKVIS announces the release of AKVIS Coloriage v.10, photo colorization software for Windows and Mac OS X. Version 10 offers Variations of coloring, new print options, and other changes.

AKVIS Coloriage lets you colorize black and white photos, replace colors in color images, perform selective desaturation or coloring. Using the program you can also turn modern digital pictures into vintage black and white images or make a sepia effect.

The software creates natural-looking colorization in a quick and entertaining manner. It works equally well for coloring portraits, landscapes, fashion, and still life. The skin, sky, verdure, and tree color patterns help you to select realistic colors for your pictures.

The program lets you breathe life into old memories. Make a present to your grandma by adding color to her early days' photos. Experiment with the color of your clothes or a car, find better color schemes for your room, or try out new colors for your eyes and hair. Play with colors, unleash your creativity! Coloriage changes the world in your images.

The new version provides innovative features. The software is now even more versatile and easy to use!

In Version 10:

- Variations of Colorization:

  The great new option has been added! It is now possible to save colorization results into the special section, and switching between them compare different versions of colorization. The new feature is only available to *Home Deluxe* and *Business* licenses owners.

  Also in the new version:

- New Print options,

- Support for more RAW files,

- New Dark interface style,

- Fixed minor bugs and some compatibility problems,

  and other changes.

Download AKVIS Coloriage v.10! Try all features of the software during the trial period without registration.

Coloriage v.10 is a free upgrade for recent buyers. If the date of the 1st activation of a license is later than *September 3, 2014* the key will work with the new version.

Existing users may check their licenses in the Customer Room. Users, whose license is not valid for v.10, can get the latest version for only $14.95.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; and on Mac OS X 10.6-10.10; both 32- and 64-bit operating systems. The product is available as a standalone application and as a Photoshop plugin filter.

The product sells for $75 for Home license (Plugin or Standalone), $90 for Home Deluxe license (both Plugin & Standalone plus additional features including the new Variations option). For Business license consult the official web-site. One license key allows activating and using the software on two computers. For more information about the software visit http://akvis.com/en/coloriage/.

AKVIS (http://akvis.com) specializes in development of image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
