

AKVIS MAGNIFIER 9.0: SUPER-HIGH RESOLUTION IMAGES IN A CLICK! SUPPORT FOR ULTRA HD

October 28, 2016 — AKVIS introduces the release of Magnifier 9.0, the efficient tool for increasing image resolution. The new version offers more configurability and customization options including the expanded pixel limit, new resolution values, support for Ultra HD, and other improvements.

AKVIS Magnifier is a professional software designed specifically for resizing images without sacrificing their output quality. The cutting-edge algorithm allows enlarging an image to a super-high resolution in just one click! The program automatically removes artifacts and preserves image details and sharpness of edges. Using the Batch Processing feature, it's possible to apply the same settings to all of the images within a directory. Resize your images in a quick and easy way!

Version 9.0 offers more flexibility with expanded pixel limit and additional resolution values. The modernized user interface now supports 4k & 5k resolution and makes the software much more convenient to use on high resolution screens. Take advantage of leading-edge visualization technology!

In Version 9.0:

- **Expanded Pixel Limit**

In the 64-bit version, the maximum pixel dimension has been increased from 30,000 px to 300,000 px. The program allows enlarging an image to a super-high resolution, making a 90 gigapixel poster!

- **New Resolution Options**

The program now supports additional resolution options: 240 dpi, 260 dpi, 360 dpi, and 720 dpi.

- **Support for 4K & 5K**

The interface has been redesigned for a better user experience. The new vector based interface elements scale correctly even on super high resolution displays!

The program offers two interface themes: *Dark* and *Light* (switch in the Preferences).

- **And other changes.**

[Download AKVIS Magnifier 9.0](#) and try all features of the software during the 10-day trial period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; and on Mac OS X 10.7-10.12. The product is available as a standalone application and as a plugin filter for Photoshop and Photoshop Elements.

AKVIS Magnifier, Home license, sells for \$89. One license key allows activating the software on two computers. Visit akvis.com for more details.

The update is free for users who bought Magnifier in the last 12 months. Otherwise you can upgrade to version 9.0 for only \$14.95.

AKVIS (<http://akvis.com>) specializes in development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
