

AKVIS ArtWork 14.0 – Photo to Painting Styles: New Stencil Effect

March 9, 2023 – AKVIS announces a major update of AKVIS ArtWork, photo to painting software with a wide variety of artistic effects. Version 14.0 offers the brand-new Stencil effect, an instant preview of presets, and support for Linux.

AKVIS ArtWork makes it easy to perform digital art from photos. It applies artistic techniques to images. With this program, users get at their disposal a whole arsenal of creative tools and styles. The software perfectly imitates the most popular painting and drawing techniques: **Oil, Watercolor, Gouache, Comics, Pen & Ink, Linocut, Pastel, Pointillism**, and the brand-new **Stencil** effect presented in the latest update.

Version 14.0 makes the program even more productive and convenient.

The new **Stencil** effect converts an image into a stencil drawing. The program allows users to make an expressive monochromatic print. It's possible to add midtone areas and apply a hatching or pop art pattern. The new effect is available for all licenses and equipped with a series of ready-to-apply presets.

The update offers a long-awaited feature - an instant preview for presets in all effects. Users can see the quick result for the presets in the preset preview pop-up window. The new version also supports for Linux and provides a series of improvements and bug fixes.
