AKVIS Coloriage 14.0: Black and White Photo Colorization

June 15, 2023 — AKVIS announces a major update of AKVIS Coloriage, popular cross-platform photo colorization software. Version 14.0 adds new features: Sample Image and Preprocessing parameters, as well as some improvements and bug fixes.

AKVIS Coloriage is a unique photo colorizing program which provides realistic looking results. It is one of the most remarkable and powerful software in its field.

Being a simple yet functional program with a wide range of color manipulation options, AKVIS Coloriage allows users to add color to black and white photos and replace colors in color images. The program is widely used in colorization and restoration projects. Its original purpose is to colorize old black and white portraits, but it works equally well for any images: landscapes, street and architectural scenes, illustrations and drawings.

Version 14.0 introduces new features which make the software even more efficient: the ability to load a sample image for coloring and new preprocessing parameters. The Sample Image tab allows users to pick colors from any other picture. The new Preprocessing parameters help to enhance an original image before colorization. Users can turn a color photo into grayscale, adjust the image brightness and contrast. Also, the update provides minor changes and interface improvements, as well as bug fixes.

Download AKVIS Coloriage 14.0 and try features during the 10-day trial period.

The software is multi-platform and runs on Windows 7-11 (32/64-bit), macOS 10.12-13.0 (64-bit), and Linux OS (64-bit).

AKVIS Coloriage is available as a standalone application and plugin for AliveColors by AKVIS, Adobe Photoshop, Corel PaintShop Pro, Affinity Photo, and other compatible graphics editors.

The program supports a multi-language interface and allows users to change the language in the program preferences on the fly.

AKVIS Coloriage comes in Home, Home Deluxe, and Business lifetime licenses, with differing levels of functionality. The Home license (Plugin or Standalone) sells for $ 75, Home Deluxe license (Plugin+Standalone) is available for $ 90, the Business licenses (Plugin+Standalone for commercial use) - for $ 199.

The update is free for users who bought the software in the last 12 months. Users, whose licenses are older and are not valid for the new version, can get Coloriage 14.0 for only $14.95. For more details about the software, please visit akvis.com.

AKVIS (akvis.com) specializes in the development of photo & video processing software. Since the company's launch in 2004, it has released a wide selection of successful multi-platform products. The company always keeps up with the times, updates its products with cutting-edge technologies, and launches innovative, inspiring products.
