AKVIS Coloriage AI 15: Add Color to Your Black & White Photos!

March 20, 2024 — AKVIS is excited to announce the release of Coloriage AI 15! The new version uses artificial neural networks and machine learning technologies for photo colorization. The update also offers new post-processing tools and other changes.

The photo colorization software by AKVIS is AI-powered now!

AKVIS Coloriage AI is a groundbreaking photo colorizing program which provides realistic looking results. The software has long been popular and is widely used in colorization and restoration projects.

With the advanced technologies introduced in the update, users can add lifelike colors to photos efficiently and effortlessly.

Version 15 integrates innovative technologies of artificial intelligence and machine learning.

Now the software has two modes: AI (Artificial Intelligence) and Classic (the previous algorithm).

In AI mode, the software uses a trained neural network that colorizes black and white photos, recognizing edges without going beyond the contours and applying colors as close as possible to reality. Unlike many other AI colorization tools and services based on machine learning, Coloriage AI does not require an Internet connection. It works in the full-featured mode, both in the trial period and under the lifetime license.

In Classic mode, users can colorize the image using colored strokes, as they did in the previous versions of the program.

The update also offers new post-processing tools that help to enhance the result, as well as other changes.

Download AKVIS Coloriage AI 15 and try all features during the 10-day trial period.

The software is cross-platform and runs on Windows 7/8/8.1/10/11, macOS 10.12 (Sierra)-macOS 14 (Sonoma), and Linux - 64-bit. The program offers a multi-language user interface.

AKVIS Coloriage AI is available as a standalone application and plugin for AliveColors by AKVIS, Adobe Photoshop, Corel PaintShop Pro, Affinity Photo, ON1 Photo RAW, and other compatible graphics editors.

The product comes in Home (either Plugin or Standalone, $ 75), Home Deluxe (Plugin & Standalone, $ 90), and Business (Plugin & Standalone for commercial use, $ 199) versions (lifetime licenses). The update is free for users who bought the software in the last 12 months. Users, whose licenses are older and are not valid for the new version, can get Coloriage AI 15 for only $14.95.

Nonprofit organizations involved in conservation and restoration of photographic archives having cultural value can get a free version of AKVIS Coloriage AI.
