

AKVIS RETOUCHER 9.0: BREATHE LIFE INTO DAMAGED PHOTOS!

November 16, 2017 — AKVIS announces Retoucher 9.0, a powerful photo restoration software. The new version offers a number of Color Correction parameters, the flexible Crop tool as well as the Vignette option that lightens/darkens the image at its perimeter.

AKVIS Retoucher is a photo restoration software that helps to remove dust, scratches, date stamps and other unwanted details from photos. Also, it is possible to improve image composition and reconstruct missing parts using the information of the surrounding areas. Depending on the type of damage, users can choose between two photo retouching modes: *All-Purpose Retouching* and *Small Defects*. Defects and details are removed automatically. Just select the areas you want to correct, press Run, and watch scratches and other imperfections vanish as if by magic!

Version 9.0 provides new parameters for performing *Color Correction* directly in the software. It is now possible to adjust brightness, contrast, and saturation values of an image as well as apply the *Sepia* filter.

The new version offers the *Vignette* effect that makes the image fade out toward the corners.

The *Crop* tool has been added. It allows cutting off unwanted areas of an image and reducing its size.

Also, the new version offers full compatibility with Photoshop CC 2018, new Gray interface theme, support for new RAW files, and some other improvements and bug fixes.

[Download AKVIS Retoucher 9.0](#) and try all features of the software during the 10-day trial period.

The software runs on Windows XP, Vista, 7, 8, 8.1, 10; Mac OS X 10.7-10.11 and macOS 10.12-10.13. The product is available as a standalone application and as a plugin filter for Adobe Photoshop and other image editors.

AKVIS Retoucher, Home license, sells for \$87. One license key allows activating and using the software on two computers. [Consult the official website](#) for more details about license types and prices of the software.

The update is free for users who bought Retoucher in the last 12 months. Users, whose license is older and is not valid for the new version, can get Retoucher 9.0 for only \$14.95.

AKVIS (akvis.com) specializes in development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
