

## All AKVIS Programs Updated: Publishing Module, Stability Improvements, etc.

March 28, 2019 – AKVIS is pleased to announce the update of all AKVIS programs. The recent versions provide support for more RAW files, the separate Publishing module, some interface changes, bug fixes, and stability improvements. The updated versions are available for download at [akvis.com](http://akvis.com).

AKVIS offers an impressive selection of standalone applications and plugins ranging from decorative artistic effects to professional photo enhancement programs. Depending on their purposes, AKVIS image editing programs are classified into five categories: [Artistic Effects](#), [Special Effects & Decoration](#), [Photo Retouching](#), [Image Enhancement](#), and [Professional Tools](#). Also, AKVIS offers a [video editing plugin](#) that has been updated as well.

The current versions of the AKVIS programs provide a number of improvements:

- Added support for more [RAW](#) files in the standalone version.
- Added the *Chinese* interface language in AKVIS Neon, AKVIS Noise Buster, and AKVIS Points.
- The *Publishing* option has been extracted to a separate module (on Windows).
- Interface themes in the *Preferences* are now presented as color plates.
- Fixed bugs and improved the stability of the program.

The recent versions are available for download at [akvis.com](http://akvis.com).

Customers who bought or upgraded their licenses during the last 12 months can update to the new versions for free. Users whose licenses are older and are not valid for the latest versions can update each program for \$14.95 or update all of the products at once for only \$39.95.

AKVIS programs can be purchased as separate products or all together in the [AKVIS Alchemy Bundle](#) with 60% discount.

AKVIS ([akvis.com](http://akvis.com)) specializes in the development of video & image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Mac.
