

## RETOUCH YOUR PORTRAIT PHOTOS WITH AKVIS MAKEUP 3.5. FIX AND SHARE!

June 9, 2014 — AKVIS announces the release of AKVIS MakeUp 3.5 for Windows and Mac. With this cutting edge software, the portrait retouching becomes easy! The program cleans up the skin and removes blemishes, whitens teeth and fixes the red eye effect. Version 3.5 offers the possibility to share images on social networks.

**AKVIS MakeUp** lets users improve their portrait photos giving them a fresh new look and a professional quality. The program intelligently recognizes the face and removes small defects on the skin, making it radiant, beautiful, pure and even.

The efficient post-processing tools like *Spot Remover*, *Teeth Whitening*, and *Red Eye Removal* help to improve the result and make the picture perfect in a quick and entertaining way.

The supplementary effects in MakeUp, *Glamour Glow* and *Vignette*, help to change the mood of the picture and add a note of magic and chic.

The software allows to make a profile picture more attractive in a mouse click! It can turn an ordinary photo into a dramatic black-and-white or high-key portrait.

Thanks to the Batch Processing feature it's possible to apply automatic retouching to series of shots of the most important events, to process marriage, anniversary, or graduation party photos.

Now the tricks of professional photographers are available to everyone!

### In Version 3.5:

- New **Share** button allows quickly publishing images from the program in Facebook, Twitter, Flickr, Tumblr, Google+.
- With the improved **RAW** files processing, the list of supported formats has been extended.
- For Windows, now two setup files are available: for 32-bit and for 64-bit operating system.
- Fixed minor bugs.

Registered customers can upgrade MakeUp to version 3.5 for free.

The fully functional trial version of the program is available at [akvis.com](http://akvis.com).

The software runs on Windows XP/Vista/Win7/Win 8 and on Mac OS X 10.4-10.9. The product is accessible in two versions: as a *standalone* program and as *plugin* to a photo editor.

**AKVIS MakeUp**, Home license, sells for \$39 or €29. [Consult the official website](#) for more details about license types and versions of the software.

**AKVIS** (<http://akvis.com>) specializes in development of image processing software. Since the company's launch in 2004, it has released a number of successful products: standalone applications and Photoshop plugins for Windows and Macintosh.
