

AKVIS POINTS 3.0: ENHANCED POINTILLISM EFFECT FOR YOUR PHOTOS!

February 27, 2017 — AKVIS announces the release of Points 3.0. The new version offers an enhanced photo-to-paintings effect, updated AKVIS presets, two user interface modes, compatibility with CC 2017, and other changes.

AKVIS is pleased to announce the release of **AKVIS Points 3.0**. The software turns digital photographs into paintings using the technique of pointillism where small dots of color are grouped by the artist to be combined by the eye of the viewer. The integrated library of versatile frames and textures allows you to give the painting more depth and visual interest. With **AKVIS Points** you don't need any painting skills to create a unique masterpiece in impressionist style!

Version 3.0 offers major feature enhancements allowing one to experiment with appearance of strokes. Additionally, the new version provides two interface modes, an updated list of built-in presets, advanced compatibility with CC 2017, and other improvements. Discover infinite creative possibilities!

In Version 3.0:

- **Enhanced Pointillism Effect**

The new version provides users with greater control over the pointillism effect enabling one to play with color, volume, and shape of strokes.

- **Interface Modes**

Version 3.0 lets you switch between two interface modes: *Express* and *Advanced*.

- **New Presets**

Some ready-to-use presets from the previous version have been modified in order to reflect the new functionality. Also, the program includes a number of brand new presets.

- **Compatibility with Photoshop CC 2017**

The plugin version is fully compatible with Photoshop CC 2017. It automatically appears in the *Filter* menu after installing the program.

- **And other changes.**
