

Top 10 AI Tools to Recolor Image

August 2, 2021 Author Rose Salia

Black and white photos have an undeniable charm, which is why even modern-day photographs like to capture monochromatic images. However, sometimes the opposite is true and you may want to bring color to a black and white image or swap between existing colors. The technology that lets us recolor images hasn't been around for that long and tools capable of achieving great results are still pretty rare, especially since not all tools are powered by AI just yet. However, there are a few good examples out there. With that in mind, in this article we're going to be looking at the top 10 best recolor image tools currently available.

2. [Akvis Coloriage](#)

Price: Starting at \$75

Akvis is one of the oldest image editing sites, first starting out way back in the early 2000s. Over the years the company has accumulate a large variety of interesting tools, including of course a color changer. The software isn't particularly easy to work with but once you figure it out, you'll be able to do a lot more with it than just recolor black and

white images. Akvis allows you to replace existing colors with different ones and perform selective desaturation on certain areas of the image, to name just a couple of its main features.

Pros:

- Many options to play with
- Replace colors
- Selective desaturation

Cons:

- Requires download
- Fairly complicated
- Pretty expensive
