You don't bother acquiring any photoshop skills. With them, you can add color to black and white

photo like an artist. We will rank them based on accuracy, colored photo quality price, and ease of use.

## 5. [AKVIS Coloriage](#)

- **Price:** \$75
- **Compatibility:** Windows & Mac

AKVIS Coloriage is a photo colorizer program that lets you add color to black and white portraits, landscapes, fashion, and still life. Instead of using AI technology, this software is more of a photo editor that lets you use brushes to add beautiful colors. For those who want to customize the colors of items in photos, AKVIS Coloriage can be a good option.

This software also allows you to eliminate red eye effect and correct color. If you think using a software is quite complicated, then AKVIS Coloriage could change your mind. As you play with the brush strokes, the software will automatically identify the edges and borders of the object. There is no need for precise work.

## Pros

- Colorize black and white photos manually but more precisely than automatic tool
- Work independently as a standalone program and as a plugin
- Offer a 10-day free trial

## Cons

- Much above average pricing
